DVXC4 Viewing Angle Guideline - Literature Part# INS4001

Please review the DVXC4 Viewing Angle Guideline before making your recoder adjustments

Locate the lock adjusting screw inside the center of the bracket (Photo A)

Using the supplied Alan Key, turn counter clockwise to loosen the screw (Photo B)

Do not remove the screw! Loosen enough to make your adjustment

Make your adjustments to your desired viewing angle by swinging the recorder forward and back (Photo C).

Turn the locking screw Clockwise to lock in your angle.

Do not overtighten the screw! Bracket damage may occur

Having a complete view of the vehicles hood will not give you a full view of the driver.

Having a complete view of the driver will not give you a full view of the vehicles hood

Rosco recommends the angle shown in the DVXC4 Viewing Angle guideline (INS4001)
